

## CentreCOM® GS900M Copper Series

### LAYER 2 GIGABIT ACCESS SWITCHES

Allied Telesis CentreCOM GS900M Series copper Gigabit access switches are cost-effective and fully managed. GS900M Series switches deliver flexible uplink connectivity with one small form-factor pluggable (SFP) slot on the 8-port model and 2 or 4 unpopulated combo ports (10/100/1000T or 100/1000FX) on the 16/24-port models.

CentreCOM GS900M Series switches feature quiet operation with a compact, fanless 8-port model and a variable fan control feature on the 16/24-port models. All models feature 0-50°C extended temperature capability. In addition, the CentreCOM GS900M Series includes ECO LED, ECO Trigger, and Power Saving Mode for energy efficiency. CentreCOM GS900M Series switches provide an intelligent, energy efficient, and cost-effective solution for the edge of the network.

### Key Features

- » Web-based graphical user interface for simplified administration
- » Supports up to 50°C extended temperature
- » Eco-friendly
  - » Tri Authentication: Any one physical port can support a combination of IEEE 802.1X, MAC, and Web Authentication. Therefore, the user doesn't have to set each port configuration based on the authentication method on the connected device.
- » Multiple Dynamic VLAN: The traffic from a device is classified into a dynamic VLAN after the connection is authenticated
- » IGMP v3 / MLD v2 Snooping: Limits the flooding of multicast traffic by dynamically configuring L2 interfaces so that multicast traffic is forwarded to only those interfaces associated with IP multicast address
